UNITED STATES INTELLIGENCE BOARD

MEMORANDUM FOR THE UNITED STATES INTELLIGENCE BOARD

SUBJECT : New Type of Soviet Surface-to-Air Missile System

REFERENCE : USIB-D-41.14/20 (COMOR-D-47/14),
22 March 1963, Limited Distribution

Following is a record of actions on the subject which were taken by USIB in restricted session at its 27 March meeting:

a. Noted the COMOR-developed statement of requirements in the reference regarding collection of information on a possible new type Soviet surface-to-air missile system and a briefing on intelligence evidence relevant thereto, which was given by  Office of Scientific Intelligence, CIA.

25X1

b. Noted Dr. Scoville's statement that deferment of USIB action on the COMOR paper at this time would not interfere with the development aspects of a new collection system to which the COMOR requirements were related. In this connection the Board also noted the emphasis which Dr. Scoville placed on the importance of this information in evaluating the vulnerability of the U. S. system.

c. Concurred in the Chairman's view that the COMOR recommendations on this matter should be placed in suspense for the time being.
